

Printer plugin for Unity3D.

Version 1.03 - Updated 17 June 2014

Mac OS X printing added (beta)

Version 1.02 - Updated 26 February 2014

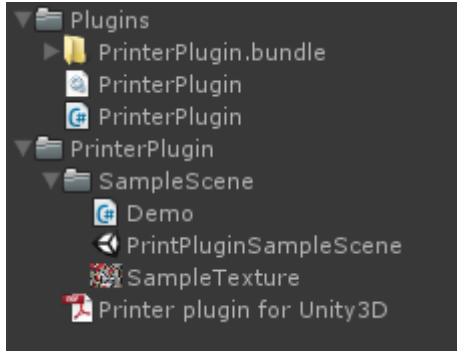

- Windows OpenGL support added

Version 1.01 – Released 23 May 2013

Introduction

Printer plugin allow you send textures from Unity to your printer with various options. Great for interactive kiosks and other installations, where you need something printed.

The asset package consists of the following files:

- Plugins
 - PrinterPlugin.dll – Main plugin DLL (Windows)
 - PrinterPlugin.bundle – OSX bundle
 - PrinterPlugin.cs – plugin static class
- SampleScene
 - Demo.cs – A sample c# script.
 - PrintPluginSampleScene.unity – A sample demo scene.
 - SampleTexture.png – A sample texture.

Installation

Requirements:

- Unity Pro 3.5 and above
- Plugin only supports Microsoft Windows and Mac OS X (beta)
- Windows XP SP3 and higher, Mac OSX 10.9 and higher

Installation steps:

1. Import the unitypackage file into your Unity project.
2. Move the “Plugins” folder into the root of your project.

How to use

Prepare texture for printing

Texture MUST be uncompressed 24bit or 32bit and read/write enabled!

Check sample c# file for usage help.

Current version function available:

`PrinterPlugin.print(texture,true,PrinterPlugin.PrintScaleMode.FILL_PAGE);`

Where:

- texture – Pointer to texture to print.
- showDialog - Boolean value for Print dialog popup.
- printScaleMode – int value for setting texture scale on printed page.
 - 0 – NO_SCALE
 - 1 – SCALE_WIDTH
 - 2 – SCALE_HEIGHT
 - 3 – FILL_PAGE

Sample usage:

```
using UnityEngine;
using System.Collections;

public class Demo : MonoBehaviour {

    public Texture2D texture;
    // Use this for initialization
    void Start () {
        //PrinterPlugin.Test();
    }

    void OnGUI () {
        // Make a background box
        GUI.Box(new Rect(10,10,220,90), "Printer Menu");
        // Make the first button.
        if(GUI.Button(new Rect(20,40,200,25), "Print with printer dialog")) {
            PrinterPlugin.print(texture,true,PrinterPlugin.PrintScaleMode.FILL_PAGE);
        }
        // Make the second button.
        if(GUI.Button(new Rect(20,70,200,25), "Print without printer dialog")) {
            PrinterPlugin.print(texture,false,PrinterPlugin.PrintScaleMode.FILL_PAGE);
        }
    }
}
```
